Personal Statement

I am a data science student focused on building practical skills and professional readiness. Currently learning relevant tools and concepts through course work and practice. Open to internships, projects, and continuous learning opportunities.

I am a data science student focused on building strong foundational skills and professional readiness. I have hands-on experience with relevant tools and concepts through academic coursework/practice projects and internships. I actively use platforms like GitHub to document my work and continuously improve my skills. I am open to internships, projects, and learning opportunities that help me grow professionally
